The property also includes a 64 m² independent casita with barbecue, wood oven, full kitchen and bathroom, as well as a storage room/workshop in which we find the automatic irrigation/fertilizer system and the diesel tank for the heating system. In summer, we can enjoy an impressive 12x6 meter pool surrounded by natural grass and with a wonderful terrace to enjoy evenings with family and friends.

In addition, the villa is equipped with two photovoltaic solar panel installations that significantly reduce energy costs. We find an underfloor heating system throughout the house, guaranteeing a pleasant temperature at any time of the year, completed by 2 fireplaces (in the living room and in the master bedroom).

The house was built with top quality materials and has been updated little by little over the years, with several renovations.

The general state of conservation is impeccable, both internally and externally.

Possibility of purchase with deferred payment (NO RENT WITH OPTION TO BUY), with the following conditions:

- * Possibility of living in the house for a maximum of 6 months.
